MAIN PROFESSIONAL SKILLS

The main competence developed throughout its own professional activity has been the Quality Management, in every respect, and in particular on Management Systems & Certifications Auditing and Consulting and Statistical Methods for quality improvement.

A deep competence on consulting, education and training has been developed as Responsible of Project Control and President of Scientific Committee in several important projects, especially in funded activities.

Through the project management of several very important activities in some important companies it was possible to develop and apply statistical methods for the performances evaluation and processes variation reduction either directly using the control factors, both reducing the variance induced by the noise factors.

Statistical Process Control, Experimental Design, Taguchi methods, Control Charts, Capability Studies are the most popular approaches used.

Projects were developed either in Italy, both in other Countries.

Fiat, Fiat Auto Poland, Serbian Automotive industries, Vishay Semiconductors, DM Elekton Italy, DM Elektron Romania, IVECO France, Ethiopian IBCA, Macau Administration handover (performance capability studies in public administration activities).
